BEAUTIFUL DISTINCTION

NATURAL, PROFOUNDLY  
AUTHENTIC SHIFTS

Drawing inspiration from the timeless beauty of English Burlington stone, this series embodies durability and elegance for architects and designers.

Each porcelain stoneware piece is uniquely stunning, showcasing intricate veins and patterns that capture the vibrant and natural beauty of its diverse shades.

Embracing authenticity with every detail. The larger sizes elevate the essence of this product, staying true to its original form.

Ceramics offer unique and outstanding performance.

#### IDEAL FOR UNDERFLOOR HEATING

An excellent conductor of heat, porcelain stoneware warms up quickly and releases heat into the air immediately, making it possible to keep the heating system working temperatures lower.

#### WEAR RESISTANT

Porcelain stoneware is an ultra-compact material, extremely resistant to wear, tread, shock, scratching and heavy loads.

#### HYGENIC

Ceramic material is easy to clean, hygienic and practical. All it takes is a simple, neutral detergent to remove dirt and restore it to its original splendour.

#### VERSATILE

All sorts of style and design variants are possible with ceramics, thanks to the wide availability of different sizes, thicknesses, finishes and colours. It can also be used anywhere, on both floors and walls, or outdoors, in residential and public settings.

#### STAIN RESISTANT

Ceramic material is resistant to stains and is not damaged by the use of solvents and detergents.

#### RESISTANT TO UV RAYS

Ceramic material does not fade even after lengthy exposure to sunlight, and maintains its aesthetic and technical characteristics over time.

#### HEALTHY

Thanks to its physical characteristics, ceramic material does not release any harmful substances or VOC (volatile organic substances) into the environment we live in, nor does it give off odours.

#### FROSTPROOF

Porcelain stoneware is resistant to frost and to all kinds of attack from the elements, making it an ideal product also for outdoors.

#### FIREPROOF

Porcelain stoneware is resistant to fire and does not emit smoke upon combustion.

#### ECO-SUSTAINABLE PRODUCTION

The production process uses a system that collects and re-uses production waste, processing water and the heat generated during the production process, thus limiting the consumption of energy and raw materials, for a more sustainable economy and lower environmental impact.
