EXCELLENCE OF ITALIAN DESIGN

Concrete: a versatile canvas for limitless creativity in design. Its neutrality, its eclectic decorating style and its ability to embody all the tactile identity of ceramics, transforming this material into an authentic ceramic product merging textures and aesthetics effortlessly

This refined collection reveals clean textures and subtle details in concrete giving rise to a light, yet robust collection with textures evocative of the material in its most natural authentic form.

Pivotal, neutral and tactile are the key features that have been shaped into this collection, the new smooth concrete look in porcelain stoneware.

In the history of modern and contemporary architecture, from the origins of Le Corbusier's brutalist current to Tadao Ando's Japanese formwork, concrete has been one of the most widely used materials in the design scene, as it allows every designer to compose and customise spaces following specific style and interior design needs.

DÉCOR OPTIONS

Decorative solutions developed with a skilful combination of contrasts between colours and glossy/mat finishes, inspired by modern architecture, in particular from Japan. Round and square elements impressed on the tiles, obtained using modern technologies, yet reminiscent of the touch of the craftsman's hand, for decorations that become authentic architectural elements, allowing for a huge variety of compositions.
