MODELLED BY TIME

Raging, serene, gurgling quietly and flowing rapidly again, water is a primordial element that conveys energy and creates harmony. A dialogue is created between the natural universe and the interior dimension, in a continuous influence on environments and perceptions. The materials are vibrant, drawing light and creating a delicate alternation between chiaroscuro and reflections, enlivening spaces with a renewed ancestral strength.

Embrace the beautiful dichotomy of nature with this collection. Textured and structured, yet smooth and delicate – just like water's effect on stone.

The essence of the beauty of natural stone and marble in the surfaces, where each detail is a tribute to the unique characteristics of these materials. Through careful observation and synthesis of natural phenomena, graphic signs have been created that infuse depth and dynamism into every texture.

The collection presents a natural palette of shading, with significant graphic and chromatic transitions between one tile and the next, whilst still maintaining an overall balance of the installed surface.

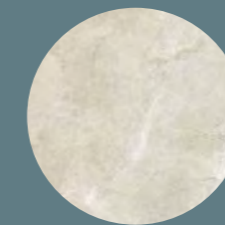

Beauty inspired by nature at its finest.

GRIP FINISH:

The raw beauty of stone in its purest form. The absence of water creates a wonderfully rough surface, perfect for outdoor settings. Its strongly textured structure adds an elemental touch to any space, bringing nature's timeless allure to life.

WHITE
inside floor 1200 X 1200 hn
outdoor floor 900 x 900 gr (20mm)

Chevron, with its classic shape emphasised by the glossy finish, translates the refined essence of the material with the elegant fishbone application that is back in the spotlight in certain contexts, especially commercial premises.

DÉCOR OPTIONS

WARM HAUT KIT
270 X 540 HN

COLD HAUT KIT
270 X 540 HN

MODERATE

The Haut kit consists of two modules - A and B. A module is formed by two overlapped square pieces: the smallest one is laid with an "offset" technique that uses a patented system of grooves cut into the back of the stoneware. The resulting module is supplied already assembled. There are two colour variants: Cold with Graphite plain tile and White upper square Warm with Natural plain tile and Beige upper square. Module B is provided in the same colour as the plain tile of Module A.

GRIP

GRIP 20MM

The moderate chromatic variation and the veining of the product is an intrinsic feature to re-create the randomness and richness of the colour shading of natural stones to which the collection is inspired. For these reasons, we recommend installing the product choosing tiles from different boxes in order to guarantee a variable and natural random effect of the finished surface. Due to these intrinsic features of the product, the colours represented in this catalogue must only be considered an example of the many possible colour shades
