# SIZES & finishes

# TERRA TERRRA

This collection is ideal for outdoor swimming pools and other outdoor spaces. For these specific uses, it features an “anti-slip A+B” surface, in addition to the standard indoor version.

The grip finish is available in all the colours and sizes of the collection to offer an anti-slip surface that seamlessly blends with indoor spaces.

The 604 x 906 mm size is also available in a thickness of 20 mm for direct laying on grass, gravel, sand or for raised and screed applications, ensuring both aesthetic consistency and high technical performance.

# SUSTAINABILITY

## Certified sustainability

This collection is made with respect for the environment through processes certified in compliance with international standards on quality (UNI EN ISO 9001:2015), environment (ISO 1400:2015 EMAS), and safety (UNI ISO 45001:2018) and according to the "17889-1 Sustainability for Ceramic Tiles" standard, which have obtained the recognition of management excellence from Certiquality.

## Energy performance and thermal insulation

This collection guarantees excellent energy performance and good thermal insulation, thanks also to its high refractive index. Due to its technical-structural characteristics and high content of recycled materials, these materials can contribute to a building's LEED® score (Leadership in Energy and Environmental Design).

## Made with locally sourced raw materials

Raw materials are sourced from quarries that follow a programme aimed at restoring the landscape and vegetation in line with environmental directives, in order to safeguard the biodiversity of the territory. For this reason, it gives preference to local raw materials within a radius of 800 Km.

## High recycled content

This porcelain stoneware is manufactured with a high content of recycled material and industrial waste. 93% of the waste from the production process is recycled internally, and only 7% is recovered from authorised external companies, thus reducing the use of virgin raw materials.

## 100% recycled packaging

The technology used for packaging makes it possible to reduce cardboard consumption by up to 50%. The packaging of Sassiepietre is made of recycled and fully recyclable material.
